This is an advanced master level course in model theory.

Content:
Two of the main goals of the course is to provide proofs of the Theorems of Baldwin-Lachlan and Morley.

Detailed information on the material covered during the semester will be regularly given here.

Final Grade:
The course grade will be based on an oral examination.

When and where: Times and dates for this lecture will be fixed during a preparatory meeting on March 1st at 12:00 in the lecture room of the Kurt Gödel Research Center (Währinger Strae 25, 2nd floor, 02.101).

If you have any questions or will not be able to participate in the preparatory meeting, please write me an e-mail.
